*Cookery . . . . means the economy of your great-grandmothers, and the science of modern chemists; it means much tasting and no wasting; it means English thoroughness, and French art, and Arabian hospitality; and it means, in fine, that you are to be perfectly and always "ladies" — loaf-givers.*

## THE INTRODUCTION

This little series of books is a collection of tested and economical recipes for everyday foods that are obtainable everywhere and suitable for any of the three meals of the day. These recipes are written in plain, everyday terms. They are not all original—the authors of many of them are unknown. They form just a little series of everyday books for everybody from everywhere.

The war has given every homemaker an opportunity to realize the difference between USE and ABUSE of foods. For years we have wasted much of the bountiful supply of food produced by our country. Let us then not go backward, but let us go forward bending every energy to make lasting the benefit in health and economy gained from a diet that not only eliminates extravagance and waste in buying and serving, but also affords greater variety.

The recipes in this series call for flour, sugar, and butter. To conserve these three foods just as long as our country and the Allies need them is the loyal and patriotic duty of—not the other fellow—but you.

### MEASUREMENTS

All measurements should be accurate to insure success. A standard measuring cup is equal to  $\frac{1}{2}$  pint.

All measures are leveled.

For  $\frac{1}{2}$  spoon divide with knife lengthwise.

For  $\frac{1}{4}$  spoon divide with knife crosswise.

For  $\frac{1}{8}$  spoon divide with knife crosswise.

### SUBSTITUTES

The same substitutes are not obtainable in every state, and for this reason the following tables are given. You may use the ones to be obtained in your community.

## FLOUR

For 1 cup of wheat flour, substitute:

- 1  $\frac{3}{8}$  cups barley
- $\frac{7}{8}$  cup buckwheat
- 1 " corn flour
- 1 " " meal
- 1 " " starch
- 1 " peanut flour
- $\frac{3}{4}$  " potato flour

- 1  $\frac{1}{2}$  cups rolled oats
- $\frac{7}{8}$  cup soy-bean flour
- 1  $\frac{1}{8}$  cups sweet-potato flour

## SUGAR

For 1 cup of sugar, use:

- 1  $\frac{1}{4}$  cups corn syrup
- 1  $\frac{1}{4}$  " honey
- 1  $\frac{1}{2}$  " maple sirup
- 1  $\frac{1}{3}$  " molasses

## BUTTER

In place of one cup of butter, use:

- 1 cup oleomargarine
- $\frac{3}{4}$  cup chicken fat
- $\frac{7}{8}$  cup clarified dripping
- $\frac{7}{8}$  cup solid vegetable fat, such as Crisco
- $\frac{3}{4}$  cup cotton seed oil

## ORIGIN, USE, AND FOOD VALUE

*Importance.* "May you have plenty of rice to-day" is the greeting in all parts of the world where this tiny grain is the symbol of prosperity. It is not a new food, for it was used by the Romans and Greeks and was mentioned several hundred years before Christ. To-day rice is the principal food for one-third of the world's population, is sold in every country, and is found on the tables of the rich as well as of the poor. It is not expensive when its cost and nourishment are compared with those of other foods.

Rice deserves to be more appreciated and to be served three times a day, for it can be used in various ways: as a cereal, soup, salad, dinner vegetable, bread, dessert, invalid food, and in made-over dishes.

*Food value.* While rice is deficient in protein, mineral matter, and fat, it is the richest cereal in starch. As an energy-giving food it leads the following: corn, wheat, oats, fat beef, lean beef, and potatoes.

As a food to balance the diet, rice is ideal.

Potatoes, bread, and other starchy foods should not be used at the same meal with rice, as they have the same food value. If used at all, they should be used sparingly.

Rice and cheese make a good combination, for the cheese furnishes the protein and fat that the rice lacks. Tomato sauce with rice gives the acid and salts that are lacking.

Either eggs, milk, or meat at the same meal with rice are good, served separately or in combination. Rice may also be served with beef, veal, chicken, and any lean meat. It

may be eaten with beans, peas, cheese, and other highly nitrogenous foods. Because it has a low quantity of cellulose, rice is easy to digest and makes an excellent starchy food for young children.

*Grades of rice.* There are three grades of rice: brown or unpolished rice, polished rice, and coated rice. The brown or unpolished rice is the only grade that retains the flavor of the whole grain. Few people really know the taste of rice, because in the polishing process rice loses not only flavor, but also much of its mineral salts. If once used, the brown rice will always be used, since it is richer in flavor.

Rice is polished to improve its appearance. This polishing, however, does not improve it as a food, but rather detracts from both its food value and its flavor.

Rice with the "shiny" look is coated. This rice has received a coating of glucose and talcum powder and is the most expensive kind. Glucose is a harmless substance that easily dissolves in cold water, but the adulteration of rice by substances that are not foods is quite unnecessary.

## HOW TO COOK RICE

In the preparation of rice there are two principles that must be observed. First, it must be cooked long enough to render it digestible. If it is cooked in a double boiler, 45 minutes should be allowed; if it is boiled directly over the stove, 30 or 40 minutes. Second, it must be cooked in such a way that the individual grains retain their shape. Instead of forming a pasty mass, the grains should remain separate from one another.

It is always best to cook starchy foods slowly and at a low temperature rather than to boil them. Therefore it is preferable to steam rice. *Never stir rice.*

First wash rice through several waters, or until the water is unclouded. This will remove the foreign substances.

## BOILED RICE

 $\frac{1}{2}$  cup rice $\frac{1}{2}$  teaspoon salt

2 cups water

Bring water to boil, add salt and rice slowly, a little at a time to keep the grains separate. Cook until grains are soft. Drain through colander and pour  $\frac{1}{2}$  pint cold water through the rice to separate the grains. Cover pot with cloth and set on back of stove (warm place) for 10 minutes to allow the grains to swell. Run knife around side of pot to remove the rice. Serve hot.

## RICE IN DOUBLE BOILER

 $\frac{1}{2}$  cup rice $\frac{1}{2}$  teaspoon salt1  $\frac{1}{2}$  cups water

Have water boiling in upper part of double boiler and add salt and well-washed rice. Cover pot and allow rice to cook until grains are soft. Remove lid and cook until rice is dry, or pour off excess water and set pot in oven to dry.

## RICE IN FIRELESS COOKER

 $\frac{1}{2}$  cup rice

1 teaspoon salt

1  $\frac{3}{4}$  cups water

Wash rice, add salt and rice to boiling water, boil 3 minutes. Place in fireless cooker, and cook 1 hour, or until soft.

## TO REHEAT RICE

Pour a little boiling water over the rice and heat with cover on vessel; or the best way is to place rice in colander over pot of boiling water for five minutes.

## RICE FOR BREAKFAST

Boil or steam as when reheating rice. Serve hot with cream and sugar, or fruit.

## RICE WAFFLES

Then add the yolks of the eggs and the rice. Thin with milk to the consistency of cake batter and fold in the beaten whites of the eggs. Have the waffle-iron hot and well greased; fill two-thirds full, close, and turn when lower side is brown.

When the mixture has become lukewarm, add the yeast and  $\frac{1}{2}$  cup flour. Allow this sponge to rise until it is very light. Add the boiled rice, which should have been cooked until it is lukewarm, and the remainder of the flour. Knead thoroughly. This dough is so thick that some pressure is required to work in the last portions of the flour. Garnish the center of the dish with slices of tomato, and encircle the edge with thinly cut rings from the pepper. Pour 2 tablespoons melted butter over all, cover lightly with a tin cover, and cook in a slow oven twenty minutes. Just before serving, add 2 tablespoons melted butter.

Scald milk in double boiler, slowly drop in rice, and cook until very soft. Stir together yolks of eggs, sugar, salt, and grated rind of lemons. Add gradually the hot rice and milk, thinning with a little more milk, if necessary, to make it somewhat thicker than a boiled custard. Turn into a baking dish and bake in moderate oven 10 minutes. Beat the whites of the eggs very stiff and add to the sugar and the juice of the lemons. Cover the pudding with the meringue and bake it until a delicate brown. Serve cold.

## JAPANESE RICE CANDY

Press cold boiled rice into balls, and add nuts. Toss into boiling candy sirup, then allow them to cool and harden.

## HOW TO USE LEFT-OVER RICE

1. Use left-over rice in place of bread crumbs for thickening soup or in making quick breads and scalloped dishes.
2. Add rice to boiled custard for dessert.
3. Stuff the centers of whole cold baked apples with rice and raisins.
4. Reheat rice, arrange it on platter, and surround it with cooked carrots seasoned with pepper, salt, and a little butter.
5. Mix rice with seasonings and a little minced left-over meat or grated cheese to make a good stuffing for tomatoes or green peppers.
6. Serve rice with prunes to make a dainty dish.

## LEFT-OVER MEAT IN RICE TIMBALES

1 cup left-over meat	½ cup gravy
1 cup cooked rice	

Line cups or molds with rice (reheated). Make layer  $\frac{1}{4}$  inch thick, let stand 15 minutes, remove from cups, and fill with meat and gravy mixture.

## USES FOR RICE WATER

The water left from boiled rice contains too much starch to be wasted. When cooked down until thick it makes a good thickening for soups in place of flour.

As a starch for sheer materials it is excellent.

## RICE WATER FOR INVALIDS

2 tablespoons rice	Milk
3 cups cold water	Salt

Wash rice, add cold water, and soak for 30 minutes. Bring it gradually to boiling point and cook for 1 hour. Strain, reheat, and dilute with hot milk. Season with salt.
